

Forklift Electrical Parts

Electrical Part for Forklifts - Forklifts can be purposely marked to be utilized in unsafe locations. A labeled lift truck indicates the design has met the least requirements of ANSI/UL 558 utilized for engine powered forklifts or ANSI/UL 583 utilized for electric lift trucks for the type of label put.

Applications for marked lift trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Ask your local insurance carrier and Fire Marshall for further information about the approved uses of industrial powered trucks in your application.

If the specific forklift satisfies the outlined standards, labels may be placed. A labeled lift truck would show the type of designation placed on the nameplate and would have a correctly corresponding label attached.
